Application Name:

Cuisine Companion

Application Description:

Cuisine Companion will be an app that CU students can use to explore nearby restaurants. They will be able to search nearby restaurants, look at local events, and leave or read reviews.

The dashboard will show the top and bottom 3 restaurants in the area for the day/week/month, and the search page will allow users to search all restaurants in the area using filters such as price, type of food, overall rating, and proximity. They will be able to look at the resulting list of restaurants as well as the reviews that have been left by other users. In addition to the search function, there will also be an events page that will show events at nearby restaurants. This would include events such as live music, happy hour, or free food.

Finally, the user will be able to leave and read reviews for restaurants. In order to leave a review, the user will have to create an account and sign in. The users will be able to delete their reviews and may be able to update or edit their reviews. Users will also be able to create an owner account if they own a restaurant.

Vision Statement:

For CU students and Boulder locals who crave new (budget-friendly) culinary experiences, Cuisine Companion is a site to discover daily deals and popular spots around Boulder. Food lovers can contribute their own opinions and experiences to help others find their new favorite restaurant, bar, or food cart.

Version Control:

<https://github.com/RioParsons/012-02-Group-Project>

Development Methodology:

Agile (See [board](#) on GitHub)

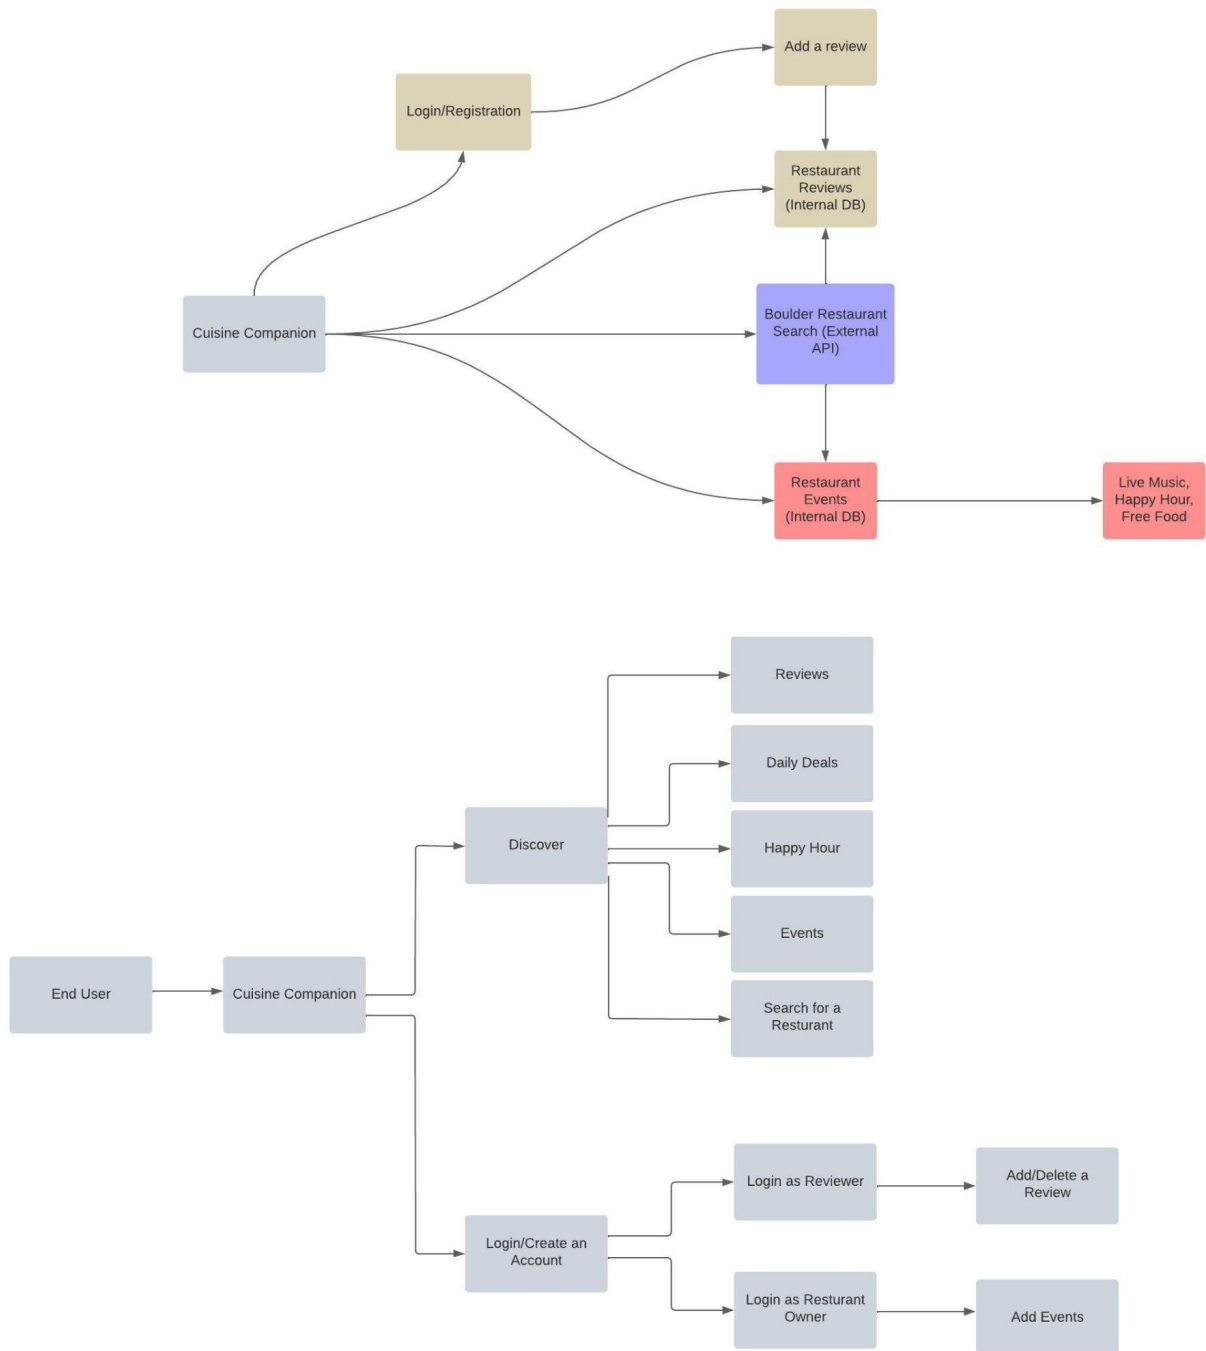

Communication Plan

We will be using Slack to communicate with each other throughout the course of the project.

Meeting Plan:

We will meet with Aishwarya at 2 pm on Mondays over Google Meet. Our group meetings will be right after our meetings with Aishwarya, at 2:15 pm on Mondays over Google Meet.
